QUALITY

ANISA INTERNATIONAL, INC. has built the only large-scale American-owned brush factory in Tianjin, China. This state-of-the-art facility blends traditional Korean brush-making expertise, Chinese manufacturing efficiency and U.S. capital, management, design and quality control. Working with Anisa International is a partnership with an American company with international representation and support across the globe.

DESIGN AND MANUFACTURING SOLUTIONS FOR THE COSMETIC INDUSTRY

INNOVATION

INTRODUCING the latest technology and creative ideas from ANISA INTERNATIONAL, INC.

**MAGNETICS**

Our latest patent-pending cosmetic brush innovation draws on simple physics to deliver a truly unique offering, truly defining versatility when it comes to on-the-go beauty. New magnetic features are utilized in interchangeable, removable brush heads, encouraging further customization of brush sets. The new half-moon brush applicator uses the magnetic concept in a new way, allowing the brush to adapt in several ways to give a more full brush when folded together, and when unfolded into the half-moon shape, can be used as a single brush applicator. These brushes are perfect for inclusion in compacts because of their versatility as well as small size.

**SKINCARE SET**

After cultivating years of experience in the creation of cosmetic brushes, Anisa International was inspired to bring our creativity and high level of professionalism into the evolving skin care arena. This 5-piece brush set is perfect for creating an at-home spa experience for the skin. Each brush is specially created to be used in conjunction with skincare products like exfoliators, precise eye treatments, face masks, cleansers and moisturizers.

Visit us online to view many other new innovations offered. As with all of our products, brush heads, handles and pouches can be customized.
